Granite Lead Time

Proposal #:

Customer Name:

Paramount Granite Company is proud of its consistently met delivery dates. We believe that we have the best lead-times in the Midwest. To help us maintain our goal of “on time, every time,” please use the checklist below to help insure that your granite fabrication process runs smoothly, and that it is installed in a timely manner.

Please read, sign, date and return to Paramount Granite Company.

- A measure may be scheduled once all of the cabinets are set and secured in place and all design decisions have been made.*** If the measure tech goes to the job site and determines it is not ready for measure, it will be re-scheduled and a trip charge may be applied to invoice.
- All remodel jobs must have existing counter tops and sub-tops, including any staples, nails, glue, build-ups, etc. removed before installation. If the installers go to the job site and determine it is not ready for install, it will be re-scheduled and a trip charge may be applied to invoice.
Paramount Granite Company does not provide the removal of this material.
- Have any sink(s) on-site for measure. If it is an undermount sink, it/they may be taken to our fabrication facility to ensure proper fit. Drop-in sinks will be measured and left on site. If sink(s) are not available during measure, have them (or the sink template) delivered to Paramount Granite Company labeled with the contractor/job name.
Note: Make sure sinks fit properly with-in the sink cabinet with enough room for faucet holes and anchors.
- Have all appliances requiring cutouts in the granite on-site for measure. These appliances would include down drafts, drop-in cook tops, slide-in cook tops and slide in ranges (up over granite). If the appliances are not available at measure time, please make sure that at least the specs are faxed before we measure. *Paramount Granite Company cannot fabricate without these dimensions!*
- Have all plumbing fixtures (faucet, sprayer, soap dispenser, lotion dispenser, purified water dispenser, hot water dispenser, etc.) on-site for measure. Fax or have on-site a sink/plumbing layout sketch detailing where the plumbing holes are in relation to the sink and distance between each hole. Plumbing fixtures will be left on-site.
- An install date will be determined after the job is measured and Paramount Granite Company has all information necessary to fabricate the job (i.e. appliance specs, faucet hole info, etc.).*** The installation date is typically up to 3 weeks after the measure. Paramount Granite Company will call the customer with the installation date as soon as it is available. Please inquire if you need to know the date in advance.
- Appliances, sinks, and/or dishwashers must be on site by the time of installation, if not by measure. Paramount Granite Company will charge a fee for the return trip(s) to complete the job (i.e. install sink, set island, mount dishwasher, etc.).

I have read the above document and by signing below, I take full responsibility for providing Paramount Granite Company with the above mentioned items before the fabrication process.
